

The United States of America

The Director of the United States Patent and Trademark Office

Has received an application for a patent for a new and useful invention. The title and description of the invention are enclosed. The requirements of law have been complied with, and it has been determined that a patent on the invention shall be granted under the law.

Therefore, this

United States Patent

Grants to the person(s) having title to this patent the right to exclude others from making, using, offering for sale, or selling the invention throughout the United States of America or importing the invention into the United States of America for the term set forth below, subject to the payment of maintenance fees as provided by law.

If this application was filed prior to June 8, 1995, the term of this patent is the longer of seventeen years from the date of grant of this patent or twenty years from the earliest effective U.S. filing date of the application, subject to any statutory extension.

If this application was filed on or after June 8, 1995, the term of this patent is twenty years from the U.S. filing date, subject to any statutory extension. If the application contains a specific reference to an earlier filed application or applications under 35 U.S.C. 120, 121 or 365(c), the term of the patent is twenty years from the date on which the earliest application was filed, subject to any statutory extensions.

(57) ABSTRACT

A safety enhanced pistol holder is provided, it has double security mechanism which consists of a locking mechanism and a safety enhanced mechanism. The locking mechanism consists mainly a braker having the function as a hook, it locks onto pistol when pistol is put into the pistol holder. The safety enhanced mechanism has a button and pin which inserts through a side hole of said braker so to prevent the braker from moving. By locking the pistol and secure the lock, pistol can be safely kept in the pistol holder from voluntary robbery and involuntary fall out. In order to pull out pistol, the user must push the button of said safety enhanced mechanism to a position of unlocking the locking mechanism, and press the pistol down to release the locking mechanism for pulling the pistol out of pistol holder.
