US ARMY TACTICAL CHEST RIG CAN BE COMBINED WITH IOTV II TACTICAL VEST

IOTV GEN II (Improved Outer Tactical Vest GEN II)

IOTV 第二代改良型外部戰術背心

產品編號 / ITEM NO.	VE02-3003-00	尺寸 / Size	Small (33" to 37" chest)	Medium (37" to 41" chest)	Large (41" to 45" chest)	X-Large (45" to 49" chest)
材質 / Material	100% Nylon 1000Denier / 100% Nylon Webbing 100% Nylon Thread / YKK Buckle	重量 / Wt	2.66 kg			

Front

Back

The IOTV is designed to take the weight of the vest off the shoulders and move it to the lower torso. The vest is also equipped with a mesh inner cover that is designed to improve airflow inside of the armor. There is also a back pad in the lower back area of the vest, which is designed to defeat fragmentation impacts to the lower back/kidney areas. The back pad does not provide ballistic protection however. The vest can withstand a direct impact from a 7.62 millimeter (both NATO and ex-Soviet types) on the front or rear trauma plates. The IOTV provides, without the ballistic ceramic plates inserted, protection from small caliber rounds (i.e. 9mm) and fragmentation..

Front

On each shoulder it has one 1 1/2" buckle for quick release of the vest

Emergency Extraction Strap on the back of the vest, convenient to lift a person.

Shoulder protection designed for greater arm and shoulder mobility Easier for Marines to shoulder their rifles

The interlayer of the vest in the front and back can be placed in each of 7.62mm M80 bullet-proof panel.

Removable MOLLE modular bullet-proof interlayer board is placed around the waist.

The webbing inside the interlayer in the rear waist can be adjustable

Single-handed emergency egress quick-release system

The vest provides more protection from shrapnel in the side of the torso, the lower back and kidney area and protects the side torso area from bullets by the integration of side armor plate carriers.

The MTV offers many points of adjustment, able to conform to any body shape. The MTV's adjustable rifle bolster that allows a wearer to better seat a rifle stock in his shoulder was a big hit. A quick-release mechanism allows Marines to get out of the vest hastily in emergency situations and allows for immediate access for medical personnel to provide first-aid.

IMPROVED MODULAR TACTICAL VEST (IMTV) - LIGHT VERSION

Single-handed emergency egress quick-release system.

The webbing inside the interlayer in the rear waist can be adjustable.

Fully adjustable external cummerbunds with handles.

It can attach with groin protection in front and back.

The Improved Modular Tactical Vest delivers not only better protection, but also enhanced maneuverability. The new protective equipment provides increased comfort, a more efficient combat load weight distribution, greater ease of weapons handling and reduced weight. Marines are always issued Enhanced Small Arms Protective Inserts, commonly called "SAPI Plates," which fit inside the IMTV and provide protection against rifle rounds.
